

## Project Initialization and Planning Phase

Date	20 February 2026
Team ID	LTVIP2026TMIDS28544
Project Name	Gemini Historical Artifact
Maximum Marks	3 Marks

### Define Problem Statements:

Historians and students often struggle to analyse and document historical artifacts because manual research is time-consuming and requires extensive knowledge, while online resources provide only generic information. The Artifact AI application addresses this issue by using AI to quickly generate accurate, structured, and context-aware descriptions based on user input, making artifact analysis faster and more efficient.

PS	I am	I'm trying to	But	Because	Which makes me feel
PS-1	A history student	Complete assignments on historical artifacts	Research takes too much time	Requires reading and organizing info	Stressed and slow
PS-2	A museum curator	Prepare artifact descriptions	Content writing is repetitive	Needs structured accurate data	Frustrated
